SKILLS

LANGUAGES:

Python • Java • C • C++
C# • PowerShell • JavaScript
SQL • Scheme

TOOLS:

Pygame • Numpy
Linux • Git • Vim

EDUCATION

UNIVERSITY OF WATERLOO

COMPUTER SCIENCE MAJOR

MUSIC MINOR

Expected Dec 2018

COURSEWORK

Algorithms
Operating Systems
User Interfaces
Numerical Computation
Artificial Intelligence
Concurrent & Parallel Programming

EXTRA CURRICULARS

MUSICAL DIRECTOR:

- Conductor at St. Cecilia's Youth Orchestra
- Musical Director at UWaterloo A Cappella Club

HOBBIES:

Yoyo • Skiing • Badminton
Martial Arts • Beatbox
A Cappella • Concert Band
Music Production

EXPERIENCE

ESOLUTIONS GROUP | SOFTWARE DEVELOPER

Sep 2016 – Dec 2016

- Developed and deployed 8 websites (out of 15 sites total from the team) for large cities and corporations using the company's internal content management system. (.Net)
- Reduced website setup time from one day to under 30 minutes by writing scripts to make REST API calls. (PowerShell, SQL)

KPMG | SR. SOFTWARE DEVELOPER

Jan 2016 – Apr 2016

- Built an application to improve the tax return preparation process, decreasing development time by 30% (3 to 5 days). Generated tax returns for over 4,000 individuals. (VBA)
- Prototyped UI for new international tax software. (C#, .Net)

TELUS HEALTH | PROGRAMMER ANALYST

May 2015 – Aug 2015

- Directed migrations to continuous integration for three teams, involving introduction to Jenkins and Git.
- Fixed QA tool to behave consistently and redesigned input format to be more intuitive. (Java)

KPMG | SOFTWARE DEVELOPER

Sep 2014 – Dec 2014

- Re-built platform to host complex questionnaire websites that filed tax returns for over 5,000 individuals. The platform is used for all future questionnaire sites. (C#.Net)
- Wrote tools and macros handling client data to save days of manual work. (VBA, Excel)

PERSONAL PROJECTS

FLOW SOLVING ALGORITHM | PYTHON

May 2017 – Present

- Designed algorithm to solve a phone puzzle game named Flow.
- Reduced search space by contracting edges of the grid based on the clustered points.
- Determined unsolvable stages to reduce width of the search tree.

TETRIS | PYTHON - PYGAME

Aug 2017

- Implemented classic tetris game based on Tetris Battle.
- Ensured smooth and intuitive behaviour.
